THE PROBLEM ISN'T 'RESIZE A PHOTO.'

It is getting every file to the examination's own specification.

SIX TABS. FOUR TOOLS. AND THE PHOTO IS STILL WRONG.

It was never your photograph. It was the specification.

Every year, crores of applications reach an upload screen like the one you're about to meet. So the routine goes: resize on one site, remove the background on another, compress somewhere else, convert the format and rename it yourself. Then you find the background was never actually removed, and you start again.

None of those tools has ever read your examination's rules. That is the whole problem, and it is the only thing we do.

What "ready" usually leaves out

~~BACKGROUND REMOVED~~	A free AI tool does that part. It won't resize the photo, get it under the file limit, or name it the way the portal wants.
~~CROPPED~~	With no idea how much of the frame your face is meant to fill.
~~READY TO UPLOAD~~	Nothing checked whether it's blurred or too dark. We flag that before you pay.
~~JUST ASK AN AI~~	Then write a prompt precise enough to get every one of these right, and check its work yourself.

PHOTOGRAPH. SIGNATURE. THUMB. DECLARATION. CERTIFICATES.

Everything the form asks you to attach, in one place.

EVERYTHING THE FORM ASKS YOU TO ATTACH.

An application is rarely one photograph. It's a photograph and a signature, often a thumb impression, sometimes a handwritten declaration, and a stack of certificates. Every one has its own pixel size and file limit, and we prepare all of them.

PHOTOGRAPH

Cropped to your examination's frame, with the background replaced and the file compressed under the limit and named the way the portal expects. Your face is left alone: no reshaping, no whitening.

SIGNATURE

The page cleared around your strokes and the ink made firm. Never stretched, because a stretched signature is no longer yours.

THUMB IMPRESSION

Lighting evened out and cropped close, but never masked, so every ridge the authority needs to see survives.

DECLARATION

We straighten your handwritten sheet so it reads clearly. The page stays whole and is never cropped down to the writing.

CERTIFICATES AND ID

A scan turned into a clean PDF, or an existing PDF put in order: pages added, removed, rearranged or merged.

WATCH IT, OR TAKE THE HANDLE.

What you gave us on one side, what came back on the other. Each frame works through its examples on its own; drag either and it stays where you put it,

WHY IT'S BUILT THE WAY IT IS.

A handful of decisions shape everything here, and none of them was the easy option.

IT NEVER CHANGES YOUR FACE.

Exposure and contrast, yes. Whitening or reshaping, never. The photograph on your admit card has to be the person who walks into the exam hall.

IT NEVER GUESSES A RULE.

Where an examination didn't publish a number, the value we use is marked est., so you know exactly which figures to check against your notification.

IT NEVER PRETENDS.

Some files we can't prepare. The portal might photograph you itself, or want your name printed on the image. When that happens the page says so, and there's no upload button pretending otherwise.

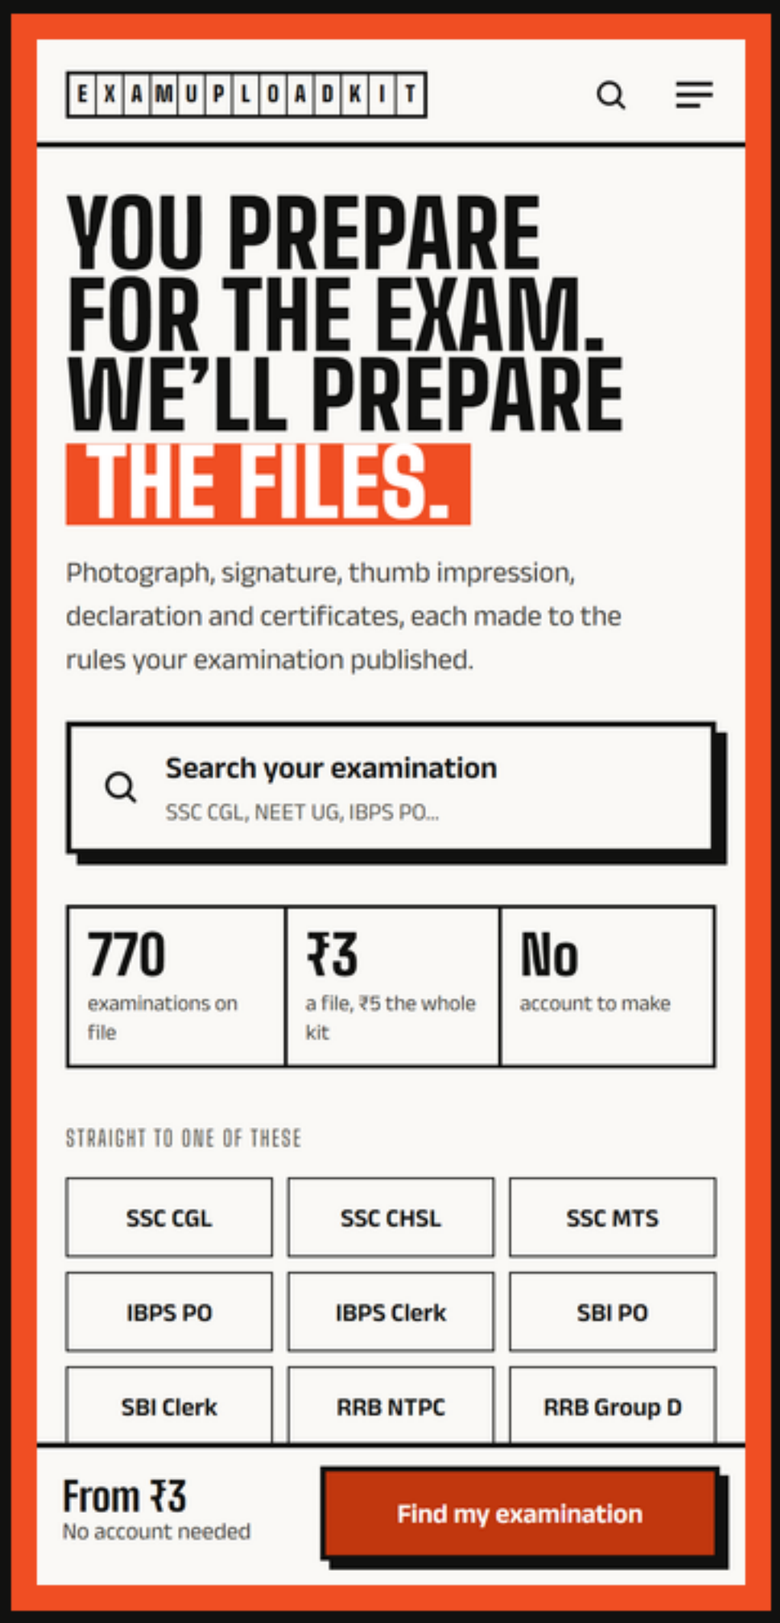

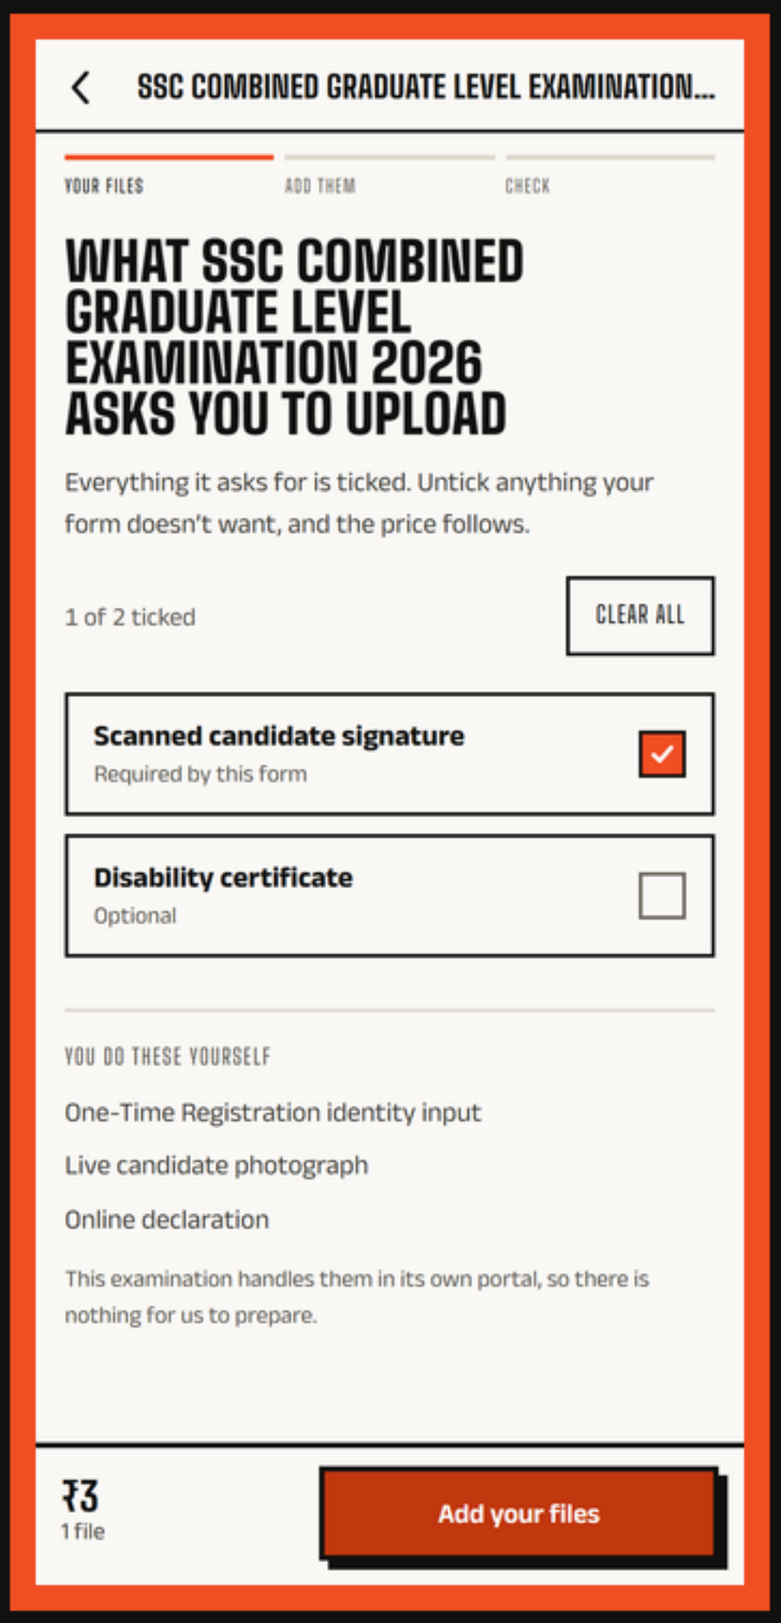

IT FORGETS YOU.

No account and nothing to sign up for. Your files are deleted within 30 minutes, or within an hour if you ask us to keep them.

INSTALL IT ON YOUR PHONE.
